Summary

I'm an urban design and planning Bachelor's degree graduate, worked for 5 years in the field of landscape as a designer and a contractor, NOW I'm shifting my career to the web development field and starting by learning new technologies of web development as a full-stack web developer.

For now, I have well hands-on knowledge in frontend web development and I'm looking forward to developing my knowledge into a great experience by penetrating the market of web development as a new candidate.

Experience
